Toby,

You had asked a couple of questions during your call with Dr. Nance today. She asked me to respond on her behalf in order to get answers to you quickly.

For 2008 Ozone DAAD, Texas will have 18 months to submit SIP revisions from the effective date of reclassification. Controls will need to be implemented no later than 18 months from proposed SIP submission deadline. For 2015 Ozone DAAD, submit SIP no later than January 1, 2023 and attain standard no later than August 3, 2024 (San Antonio September 24, 2024). EPA is also looking for comments on allowing up to 4 years for implementation of I/M programs. Recognizing concerns such as the one you raised on 185, EPA is considering whether other flexibilities are appropriate for the 185 fee requirements set forth in the CAA.

Please let me know if you have any questions or need anything else. Thank you.
